

Change File Type

There are many things you can do using the Files app on your iPad. Changing the file type is just one of them.

(A) With the files displayed as icons the file size is shown 1.6 MB.

(B) Touch-and-hold the file and (1) Select **Quick Actions** and then (2) **Convert Image**.

(C) The original file is PNG and I selected JPEG (then **Image Size > Original size**).

(D) The JPEG file is 255 KB.

BOTH the PNG and JPEG files are now available so you can compare them.
